

MINECAST PRO

SmartTrack Vision System

**ONE CAMERA,
FULL CONTROL**

MineCast Pro delivers low-latency wireless video for underground remote mucking. Mounted on the cab side of the midship, SmartTrack uses steer-angle tracking to follow the bucket, maintaining a clearer view of the scoop in the muck pile for more efficient loading.

SYSTEM SPECIFICATIONS

- 900 MHz Wireless Link
- Optimized for Underground NLOS Performance
- Low-Latency Real-Time Video
- FCC & ISED Certified
- Removable 18V Lithium-Ion Battery Packs
- Articulation-Based SmartTrack Bucket tracking

SYSTEM ARCHITECTURE

MineCast Pro combines a cab-side SmartTrack camera with steer-angle-based bucket tracking and a rugged, water-resistant HD video monitor. Magnetic mounting and removable 18V lithium-ion battery packs support fast installation and mobile operation.

WHY MINECAST PRO

- SmartTrack articulation-based bucket tracking
- One camera. Full operational visibility.
- Installs in minutes with magnetic mounting
- Eliminates cable-related complexity
