

AUDIO/VISUAL ALARM SYSTEM

Programmable Industrial Annunciator for Mobile Equipment

The Minewise Audio/Visual Alarm System delivers programmable voice and light alerts based on vehicle trigger conditions. Designed for 12V and 24V mobile equipment, the system monitors configurable inputs to automatically broadcast custom safety messages and visual indicators when defined machine states occur.

SYSTEM SPECIFICATIONS

- 12V / 24V Vehicle Power Input
- Configurable Digital Trigger Inputs
- Multiple Programmable Audio Messages
- Integrated High-Output Speaker
- Dual Visual Indicator Strips
- Sealed Industrial Enclosure

Housing & Integration

The system interfaces directly with vehicle trigger signals such as park brake release, seatbelt status, door switches, or other defined inputs. When activated, the unit automatically plays a pre-programmed audio message and activates visual indicators, reinforcing safe operating procedures in real time.

Automated Safety Reinforcement

- Plays custom messages based on vehicle conditions
- Reinforces critical operating procedures
- Supports multiple trigger inputs
- Designed for harsh mining environments
