

RUGGED CELLULAR INTEGRATION SYSTEM

Industrial Smartphone Enclosure
for Mobile Equipment

Designed for underground mobile equipment, this rugged enclosure protects standard smartphones in harsh environments. Stainless steel shaft-sealed buttons, a water-resistant housing, and integrated 12/24V vehicle power provide secure device mounting and dependable connectivity in demanding mining conditions.

SYSTEM SPECIFICATIONS

- Stainless Steel Button actuators
- Gasketed Housing with O-Ring & Shaft-Seal Protection
- 12V / 24V Vehicle Power Integration
- RAM Mount Hardware Compatible

Housing & Integration

The enclosure integrates sealed external control buttons with internal smartphone mounting and industrial power regulation for 12V or 24V vehicle systems. Designed for mobile underground equipment, the housing protects devices while maintaining full operational usability in harsh conditions.

Why a Minewise Enclosure?

- Protects consumer devices in industrial environments
- Maintains usability with sealed external controls
- Customizable to multiple smartphone & tablet configurations
- Mounts with reliable RAM hardware
